

## ***The Fastest Service!***

## ***No More Waiting!!!***

## ***LIGHTWAVE ADVANTAGES:***

**It is Always On;** no more waiting on dial up. You connect instantly. It's there waiting for you now.

**It doesn't use a Phone Line;** no more sharing a single line- save money and eliminate that 2nd line.

**It is Faster;** up 100 times faster than dialup. Faster connections than Satellite, Cable or DSL connections can even offer!

**It Uploads faster than Cable or DSL;** Canopy is not limited to slow uploads, not like slower competitive systems that run at limited speeds like satellite, cable and DSL.

**It is Secure & Reliable;** using encrypted communications and only high performance Motorola Canopy™ products from a recognized leader in wireless communications whose name means quality.

**It's Guaranteed;** If you sign up and the Canopy Subscriber Module can't connect due to obstructions or terrain issues. We offer a no penalty return policy.

### **Add Our LightPhone Digital Phone Service**

& save even more by reducing your telephone costs with low rates in the US & Canada!

## ***HIGH-SPEED INTERNET SERVICE***

***NOW SAVE \$100!!!***

**Available in St Ignace,  
Pentland Township,  
Kinross, Rudyard,  
DeTour, Dafter  
& Bruce Township!**

# **6 YEARS of SOLID SERVICE & RELIABILITY!**

Lighthouse.net, the largest local Internet Service Provider has been leading the way with broadband internet connections for homes and businesses in the E.U.P for over SIX YEARS! Lighthouse uses state of the art Motorola Canopy wireless internet systems in the St Ignace, Kinross/Kincheloe, Rudyard, DeTour Village, Dafter, Bruce Township on 12 Mile Road and now in Pentland Township in Newberry. These new wireless sites offer fast secure internet to almost any customer with a programmed SM within approximately three miles of the broadcast points. Connection speeds start at a fast 512Kbps and are available up to 3Mb for true broadband capabilities. Our wireless system uses a LightWave Canopy Subscriber Module that is installed at the customer's location. The Subscriber Module is mounted outside, facing in the direction of the broadcast point. The current broadcast points located in Kinross, Rudyard and DeTour Village are water towers. In St Ignace there are two broadcast points; the 2<sup>nd</sup> Street water tower and downtown at Shepler's dock. Dafter is broadcast from the Cloverland Electric Cooperative Tower on M-28. Bruce Township is on our new tower on 12 Mile Road East & we have two broadcast points in Pentland Township to cover the area South of Newberry in Luce County. Typical connection for Near Line of Sight must be within 2 miles of the broadcast point. If you have a clear view of the broadcast point (LOS) you can connect to the LightWave system. Terrain and tree coverage can affect the ability to connect and connection strength varies with obstructions and distance.

Now you can also add our LightPhone Digital Telephone Service to your LightWave Canopy for as little as \$9.95 a month. LightPhone offers calling across the US, Canada and Puerto Rico for one low monthly cost. In fact our Unlimited Calling Plan is just \$24.95 a month so you can make those long distance calls for next to nothing with LightPhone. Call us today to find out more about LightPhone and how you can save by having your phone service from Lighthouse!

## **LIGHTWAVE Special!**

New subscribers save an additional \$100 starting on June 1<sup>st</sup>, 2008 until March 1<sup>st</sup>, 2009. The Subscriber Module has a normal list price of \$725.00 but as a Lighthouse Subscriber you can purchase it for just \$299.00 until 3/1/09! Our special discount price includes a complete self installation kit with instructions. That's \$426.00 off the normal \$725.00 retail price! If you don't feel you want to install it yourself, we have trained installers available at a nominal charge. They are setup and programmed for use immediately when installed.

**Don't miss this special price offer!**

#### *Example of Subscriber Module Installation*

*Mounting will vary by location and building type.*

## **Subscriber Module**

The LightWave MOTOROLA Canopy Subscriber Module (SM) connects to the internet using a secure wireless signal. The unit is connected to your computer using industry standard 10/100 Ethernet (Cat5E) cabling. Your Computer requires an industry standard LAN plug (RJ45) or the Subscriber Module can connect to a hub, switch, router or firewall. The connection can be networked with additional computers using a single SM. This system is designed network ready!
