

MOTOROLA

Quality & Reliability!

The **LIGHTWAVE Canopy Broadband System** uses Motorola Canopy 900 Wireless equipment. This system allows subscribers to connect wirelessly with "Near Line of Sight" within about 3 miles of the broadcast point. Lighthouse.Net is an Authorized Motorola Canopy Reseller and only uses quality Motorola Canopy systems.

LIGHTWAVE ***ADVANTAGES:***

It is Always On; no more waiting on dial up. You connect instantly. It's there waiting for you now.

It doesn't use a Phone Line; no more sharing a single line- save money and eliminate that 2nd line – major savings over ISDN lines.

It is Faster; up 100 times faster than dialup. Faster connections than Satellite, Cable or DSL connections can even offer!

It Uploads better than Cable or DSL; Canopy is not limited to slow uploads, not like slower competitive systems that run at limited speeds like satellite, cable and DSL.

It is Reliable; using only high performance Motorola Canopy™ products from a recognized leader in wireless communications whose name means quality.

It is Secure; the Motorola Canopy systems uses encrypted communications and is more secure than your internet connection.

It's Guaranteed; If you sign up and the Canopy Subscriber Module can't connect due to obstructions or terrain issues. We offer a no penalty return policy.

HIGH-SPEED INTERNET SERVICE

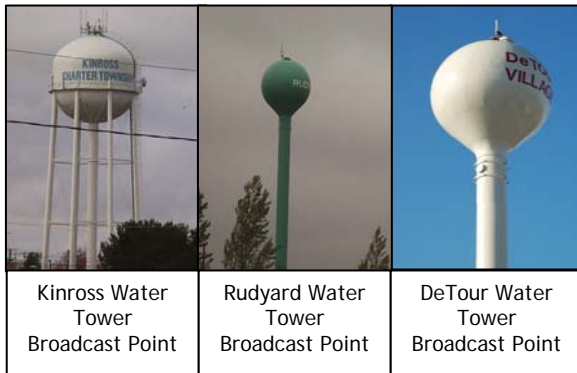

**Available in Kinross,
Rudyard and DeTour!**

Fast Internet Is Finally Available In Your Area!

Lighthouse.net, the largest local Internet Service Provider is leading the way again by providing broadband internet connections for homes and businesses in the E.U.P. Lighthouse has installed new state of the art Motorola wireless internet systems in the Kinross/Kincheloe, Rudyard and DeTour Village areas. These new wireless sites offer fast secure internet to almost any customer within approximately three miles of the broadcast points. Connection speeds start at 512Kbps and are available up to 3Mb for true broadband capabilities. The wireless system requires a Subscriber Module be installed at the customer's location. The Subscriber Module needs to be mounted outside in the direction of the broadcast point. The current broadcast points are located in Kinross, Rudyard and DeTour Village at the water towers. Typical connection for Near Line of Sight must be within 2 to 3 miles of the broadcast point. Terrain and tree coverage can affect the ability to connect beyond that distance.

These systems can also connect customers up to 20 miles away with a True Line of Sight connection.

LIGHTWAVE Equipment

The MOTOROLA Subscriber Module Antenna (SM) connects to the internet using a secure wireless signal. The unit is connected to your computer using industry standard 10/100 Ethernet (Cat5) cabling. Your Computer requires an industry standard LAN plug (RJ45) or the Subscriber Module can connect to a hub, switch, router or firewall. The connection can be shared with additional computers using a single SM. This system is designed network ready with a fast, always on Broadband connection!

Example of Subscriber Module Installation

Mounting will vary by location and building type.

Subscriber Module Options

The Subscriber Module can be purchased for only \$359.00 (after \$40 Motorola mail in rebate) and includes a complete self installation kit with instructions. That's over \$350 off the \$725.00 retail price! If you don't feel you want to install it yourself, we have trained installers available at a nominal charge. They are setup and programmed for use immediately when installed.
