

CUT THE WIRES AND SURF FASTER!

Your time is valuable. Lightwave Broadband connects you instantly and gets you surfing faster, too! That means no more snails pace from page to page and 30 minute downloads come in three minutes. The speed is there to share so you can network and share the connection.

LIGHTWAVE CONNECTION ADVANTAGES:

It is always on – no more dial up waiting. You connect instantly. It's there waiting for you now.

You don't need a phone line – no more sharing a single line- eliminate that 2nd line – major savings over ISDN lines.

It is fast – from 5 to 50 times faster than dialup. Our system is designed to provide the same speeds Up and Down, not like slower competitive systems that run at half speed on uploads.

It is reliable – entire system is Motorola Canopy™ from a recognized leader in wireless communications whose name means quality.

It's not shared like cable or DSL, you get the bandwidth all the time and burst speeds allow super fast access speeds. Lighthouse has the bandwidth required to provide the speed when you need it. Selling faster internet connections requires a provider with enough bandwidth to deliver and Lighthouse delivers!

Canopy BROADBAND

**THE FASTEST SERVICE
IN SAULT STE MARIE**

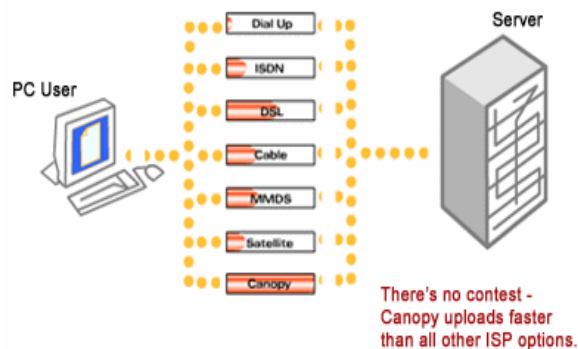

FAST! SECURE! RELIABLE! LIGHTWAVE BROADBAND!!!

Lighthouse.net, the largest local Internet Service Provider is leading the way again by providing broadband internet connections for homes and businesses in the Sault area. Our secure state of the art Motorola Canopy wireless internet system provides faster uploads than DSL or Cable can offer. Connection speeds start at 1Mb and are available up to 14Mb for true broadband capabilities. No additional phone or television plans are required, saving you money! The price is the same to all subscribers, not higher priced for small business like others. No telephone connection is needed, the Canopy connection system is always on and waiting for you to fly around the internet. The world is waiting for you.

LIGHTWAVE Canopy is faster for uploads than Cable or DSL!

Below is a speed comparison of a 2.5 MB file upload from PC* to server

Canopy Connections

The MOTOROLA Subscriber Module Radio Antenna (SM) connects to the internet over a wireless signal. The unit is connected to your computer using industry standard LAN (Category 5) cabling. Your Computer requires an industry standard LAN plug (RJ45) or the Subscriber Module can connect to a hub, switch, router or firewall and then share the connection to additional computers. This system is designed network ready to allow sharing of your Broadband connection!

Customer Equipment Requirements

Motorola Subscriber Module \$299.00

Requires additional mounting hardware and accessories. Installation additional.

(Installation by approved contractor recommended)

Example of Universal Mount Installation

Mounting will vary by location and building type.

The Subscriber Module requires the ability to have an unobstructed view of one of our broadcast points. The current Sault broadcast points are the City water tower located behind Big Lots on the I-75 Business Spur and the Tower of History on Portage Avenue. Connections can be made up to 15 miles from these broadcast points. A free GPS terrain plot is offered for customers beyond line of sight to determine feasibility of the installation.
