

Lighthouse.Net

ACCEPTABLE USE POLICY

This document is intended to provide a general understanding of Lighthouse.Net Internet's policy on the Acceptable Use of the LIGHTHOUSE.NET Internet access service (the "Service"). It is designed to help protect our Service, our customers ("Subscribers"), and the Internet community, from irresponsible or illegal activities. We hope and expect that common sense and good judgment will guide all of our subscribers' Internet activities. These guidelines point out generally accepted practices on a range of topics and the general LIGHTHOUSE.NET Internet Service approach to these areas. All Subscribers are also subject to the Lighthouse.Net General Terms & Conditions of Service (T&C) which can be found at www.lighthouse.net.

WildBlue Satellite subscribers who are served by Lighthouse.Net also subject to WildBlue's Terms & Conditions and Fair Access Policy as per their contract and service requirements. In the event of conflicting policies or conditions, the WildBlue policies would take precedence over Lighthouse in matters of service delivery unless such items are covered by the WildBlue Subscriber Contract. Please refer to your contract and the WildBlue website at www.wildblue.com for their latest information.

The key contributing factors to decisions and actions taken on Acceptable Use Policy violations include but are not limited to protection of our customers and our resources, provision of quality service to our customers, compliance with applicable law, and the protection of our reputation as a service provider.

If a LIGHTHOUSE.NET Internet account is involved in a violation of these policies, we reserve the right to suspend or terminate Service without notice, at our sole discretion. Our preferred course of action would be to advise the account owner of the inappropriate behavior and any corrective action that may be necessary. However, repeated or flagrant violations of these policies may result in immediate and permanent termination of Service.

In the event that an account is deactivated or canceled as a result of any activities proscribed by these policies, the account may be subject to set-up fees, reactivation charges, administration fees and/or deposit requirements to be determined by LIGHTHOUSE.NET Internet if such account is permitted to be re-activated or re-established. Users whose accounts have been canceled for misuse or violation of the Service Agreement or these policies are not entitled to re-register for the Service without express written approval from LIGHTHOUSE.NET Internet outside the normal flow of the registration process. Any further registrations for the Service by or for the user whose account has been terminated for such activities may be rejected or the new account(s) may be terminated upon discovery, and such further registration or use may subject the user to additional account set-up, analysis, monthly usage and/or termination charges for each such registration in amounts to be determined by LIGHTHOUSE.NET Internet.

LIGHTHOUSE.NET Internet may take such action as it deems appropriate against any subscriber or account user for violations of the General Terms & Conditions of Service, any individual Lighthouse Contract or Agreement for Service or of these policies. However, there is no promise or obligation on our part to monitor or police any such activity and LIGHTHOUSE.NET Internet will have no liability to any party for any other party's violation of these policies or the Service Agreement.

Impersonation

You may not attempt to send Electronic Mail or News articles using a name and address of someone other than yourself. Attempting to impersonate any person, using forged headers or other identifying information, is prohibited. Attempts to do so that are discovered by LIGHTHOUSE.NET Internet or reported by other parties may be reported to the proper authority immediately, and may result in the offending account being terminated immediately. The use of anonymous re-mailers and nicknames, by themselves, does not necessarily constitute impersonation if it is not being done with the intention of misleading the recipient or another party into believing that you are some other specifically identifiable user or person other than yourself.

Network unfriendly activity

Activities which adversely affect the ability of other people or systems to use LIGHTHOUSE.NET Internet Services or the Internet is prohibited.

Unauthorized uses - non-payment

Sharing accounts on with anyone other than immediate family members/employees in the same residence/business location or re-selling Service without express written consent from LIGHTHOUSE.NET Internet, or offering any public information service using such accounts, such as running a web server or FTP server, is prohibited. Certain Internet Service Products allow a specific number of simultaneous connections for multiple PC's to share a single connection, exceeding the number of allowable simultaneous connections is prohibited. Subscribers may not provide public or commercial information over such dial connections. LIGHTHOUSE.NET Internet does offer dedicated connection services for such purposes. Untimely payment of any and all amounts due may result in account cancellation.

Excessive usage, bandwidth or disk utilization

Where LIGHTHOUSE.NET Internet account, service or feature descriptions specify limits on bandwidth and/or disk utilization, use in excess of those limits is not permitted without an appropriate change in account type or status and may incur additional charges for such usage. Bandwidth and disk utilization will be computed or determined by LIGHTHOUSE.NET Internet from time to time in developing its product and service offerings. In addition, sessions on accounts which exceed a reasonable time may be terminated in order to protect network resources and preserve Service availability for other users. In the event LIGHTHOUSE.NET Internet determines that an account is exceeding the relevant bandwidth or disk utilization, or frequently exceeding reasonable session's times for dial-up accounts, the account owner will generally be notified by e-mail. If the excess use continues after such notification, the owner may be requested to upgrade the account's Service agreement or to modify the activity creating the excess use, or the account may be terminated.

If excessive bandwidth, disk space utilization or session length is determined to adversely affect LIGHTHOUSE.NET Internet's ability to provide service, immediate action may be taken. The account owner may be notified by phone or e-mail as soon as practicable thereafter.

Infected computers may cause excessive usage or Spamming and will be removed from the network immediately. The Subscriber will be responsible for all costs or remedies to resolve the excessive use or infection in order to be allowed back on the Service. Infected computers must be properly cleaned and verified by Lighthouse.Net to be allowed reconnection. If the Subscriber is allowed back on the service but continues to have excessive use, the Subscriber can be permanently disconnected for abuse of the Service.

Idle Timeouts

Dial-up account sessions that use the LIGHTHOUSE.NET Internet Service are subject to idle timeouts. An account session may be determined to be idle if there appears to be no interactive, human generated data received from the remote user's computer system within a prescribed amount of time. Refer to the "Terms and Conditions" guidelines for specific information.

Automated Data

Data that is generated on a user's computer system automatically, either by an automated program, script, automatic re-dialers or any other software device, is considered automated data. Automated data of any kind is not considered interactive use of the LIGHTHOUSE.NET Internet Service, and as such, may be disregarded in determining idle timeouts.

Subscribers to "limited access" or "unlimited access" plans for dial users may make reasonable use of the Service within the "Terms and Conditions" guidelines. Specific plans have limits on hours used and access times. These plans are not intended to provide full-time connections and the Service may be disconnected after a significant period of inactivity or after sessions of excessive length. Subscribers should keep the connection open only when actively using it, and may not use any automatic method to avoid inactivity disconnect. Intentional use of automated data methods to avoid idle timeouts on dial-up accounts is prohibited and grounds for account termination at LIGHTHOUSE.NET Internet's sole discretion. This includes the use of automatic redialers to reinstate an idle connection.

Misuse of Subscriber Account

Internet access accounts cannot be transferred or used by anyone other than the subscriber and members of the subscriber's immediate family or business. Account sharing (other than among immediate family members) is strictly prohibited. No more than one login session can be active at a time on a subscriber's dial-up account. No more than the number of simultaneous connections can be used on specific plans. Accounts which have been transferred to other parties, or which show other activity in violation of this condition, may be terminated without notice.

Service, Network and System Interference

Subscribers may not attempt to interfere with or compromise the operation of the LIGHTHOUSE.NET Internet network in whole or part, to interfere with any of the equipment comprising the system, or to access other accounts or restricted areas of the system.

Subscribers may not use LIGHTHOUSE.NET Internet's systems in a manner that adversely affects the availability of its resources to other LIGHTHOUSE.NET Internet customers.

Facility Usage

Subscribers may only use those LIGHTHOUSE.NET Internet Service online and computing facilities and Service areas which have been authorized for subscriber use. If access is protected by a password, subscribers are not to make this password available to others or use the password(s) of others to gain access to such areas. Subscribers may not attempt to find out the password of another user, nor aid such attempt by any other person.

Subscribers may use LIGHTHOUSE.NET Internet Service online and computing facilities and Service areas only for authorized purposes.

Subscribers may not attempt to interfere with the proper or intended operation of any computing facility.

Subscribers may not attempt to subvert -- or aid others to subvert -- the security of any computing facility.

Subscribers may not interfere with use by any other authorized user, nor compromise the confidentiality of LIGHTHOUSE.NET Internet's or any other party's internal business practices or records.

Any attempts, whether successful or not, to gain access to any computer system or customer's data without consent is prohibited.

Privacy

It may be necessary for LIGHTHOUSE.NET Internet employees or representatives to examine system operational and accounting logs and other records to resolve Service-related problems. LIGHTHOUSE.NET Internet reserves the right to access an account's mailbox or other features to resolve problems or mail system errors.

In addition, LIGHTHOUSE.NET Internet will cooperate with the appropriate legal authorities or other parties in investigating claims of illegal activity, including but not limited to illegal transfer or use of copyrighted material, postings or e-mail containing threats of violence, or other illegal activity.

LIGHTHOUSE.NET Internet makes no guarantee and assumes no liability for the security of any data on any server including those designated as "secure servers."

No computer system can be completely protected or should be considered 100% safe from intrusion. E-mail and other data transmissions over the Internet may pass through many computer systems, and should not be considered a secure means of communication unless encrypted. Even then, such information is only as secure as the encryption method used.

LIGHTHOUSE.NET Internet does not generally monitor the activity of accounts except to measure system utilization and accumulate billing records. However, in our efforts to protect the integrity of our Service and fulfill any responsibility we may have as good citizens within the Internet community, if we become aware of inappropriate use of the LIGHTHOUSE.NET Internet Service we may respond accordingly.

Censorship

LIGHTHOUSE.NET Internet does not intend to censor the content of any newsgroups or other communications passing through its systems. We believe such choices should generally be left to the individual subscriber. Software tools are available to screen a subscriber account's access to newsgroups and Web sites that might be considered offensive. It is the subscriber's responsibility to make use of such tools if desired.

Newsgroup postings and other e-mail messages sent via LIGHTHOUSE.NET Internet and the Internet are communications between the senders and consenting receivers thereof, and LIGHTHOUSE.NET Internet has neither the authority nor the responsibility to regulate their content. The views and comments expressed by LIGHTHOUSE.NET Internet subscribers or other senders of such postings or messages are solely those of their authors and do not reflect any review, approval or endorsement by LIGHTHOUSE.NET Internet. LIGHTHOUSE.NET Internet will, however, attempt to assist subscribers who continually receive e-mail they deem to be objectionable and/or unsolicited e-mail and who notify LIGHTHOUSE.NET Internet of the problem.

Illegal Activity

Internet access and all other Services provided to LIGHTHOUSE.NET Internet subscribers may be used for lawful purposes only, and use by a subscriber of the LIGHTHOUSE.NET Internet Service for the transmission or storage of any information, data, or material in violation of any federal or state regulation or law (including, but not limited to, material protected by copyright, trade secrets, and information that is confidential as a matter of law) is strictly prohibited. The subscriber may not use the LIGHTHOUSE.NET Internet Service to transmit or store any information, data, or material that is threatening, libelous, or obscene.

Copyright Infringement

It is assumed that, unless otherwise specified by the sender, all data distributed on the Internet by the sender is intended to remain the intellectual property of the sender or the party who furnished such data to the sender, and each subscriber transmitting any such data (or making it available for download or other transmissions) is assumed to warrant that he or she has full ownership rights or appropriate licenses to the reports, documents, photographs, graphic images, audio files, video files and other data placed on the subscriber's personal web pages or otherwise transmitted. LIGHTHOUSE.NET Internet subscribers are solely responsible for any actions which may be necessary to protect ownership rights in such data. Subscribers acknowledge that LIGHTHOUSE.NET Internet has no control over the individuals using the Internet and that LIGHTHOUSE.NET Internet expressly does not warrant that any individuals might not make copies of or otherwise infringe upon the subscriber's information as distributed on the Internet.

Subscribers should be aware of the law of copyright as it affects computer software and other information or materials available or accessible on the Internet. A formal copyright notice need not be in evidence for legal copyright protection to be in force.

As a general rule, the subscriber is the copyright owner of any file which that subscriber solely creates for his or her own exclusive use. Any other file is copyright either by its creator, by commercial vendors, or by other individual users, and it is generally illegal for the subscriber to reproduce such file in any part or in any form, except by permission of the copyright owner or under an appropriate statutory exception.

Ownership of any software developed or modified by LIGHTHOUSE.NET Internet and all graphics, text or other information or content materials supplied or furnished by LIGHTHOUSE.NET Internet as part of the LIGHTHOUSE.NET Internet Service or for incorporation into a subscriber's personal Web page in connection with the Service shall remain with LIGHTHOUSE.NET Internet (or the party which supplied such materials to LIGHTHOUSE.NET Internet).

Removing or falsifying the source or origin of software or other material contained in a file that a subscriber has uploaded is prohibited.

Knowingly receiving or downloading a file that cannot be legally distributed is prohibited, even though a file may have been mailed or posted notwithstanding such illegality.

E-Mail Notices from LIGHTHOUSE.NET Internet

Users may receive announcements from time to time from the LIGHTHOUSE.NET Internet Service via e-mail if practical. E-Billing is used for account billing for most services. Email is not the preferred method for notices or service affecting issues and Lighthouse will refrain from using "all user" email in order to improve security and reduce the potential of spamming.

User Important Notices and News from LIGHTHOUSE.NET

The preferred method for important news and notices from Lighthouse to users is our website's home page. The home page will have current information that is important for all users. We recommend visiting the home page (www.lighthouse.net) daily or at least weekly to check on news and notices. Since it is impractical to contact each user individually and not all users have email, Lighthouse will use the home page as the primary form of communication to all users. Important news and notices can include various aspects of the Service, including without limitation notices of feature upgrades or changes, Service-affecting issues or events, special offers for Service users from LIGHTHOUSE.NET Internet distribution partners or other parties, etc.

Unsolicited E-mail

Sending mass, unsolicited e-mail by Service users is prohibited.

Using a LIGHTHOUSE.NET Internet e-mail address to collect responses from unsolicited commercial e-mail is prohibited.

Sending unsolicited e-mail advertising a service or web site, newsgroup, etc. located or hosted within the LIGHTHOUSE.NET Internet domain space or address space, or service otherwise associated with LIGHTHOUSE.NET Internet is prohibited regardless of e-mail point of origin.

Mail bombing

Sending large volumes of unsolicited e-mail to a single user, or group of users, commercial or otherwise, by Service users is prohibited.

Harassment

Sending outrageously threatening or harassing e-mail (for example, making terroristic threats, or threatening physical injury or damage to persons or property), especially after being requested to stop, is prohibited. However, not every "flame" message or angry exchange of e-mail can automatically be considered harassment. LIGHTHOUSE.NET Internet is not responsible for the content or tone of any e-mail or other transmissions of the subscribers to its Service or other parties using the Internet, and subscribers or others should not expect that LIGHTHOUSE.NET Internet will attempt to mediate or otherwise become involved in any particular disagreement or dispute between Internet users. However, LIGHTHOUSE.NET Internet will cooperate with appropriate law enforcement agencies involved in investigating instances that may be reported to such authorities by subscribers or other users who believe they are being subjected to potentially unlawful harassment.

Other E-mail related issues

Subscribers also may not engage in the following activities while using the LIGHTHOUSE.NET Internet service:

- Intercepting, redirecting or otherwise interfering or attempting to interfere with e-mail intended for other parties;
- Mailing or sending files that contain copyrighted, commercial software or other material protected by intellectual property laws (or by rights of privacy or publicity) unless the user owns or controls the rights thereto or has received all necessary consents;
- Knowingly or maliciously transmitting files that contain a virus or corrupted data;
- Knowingly deleting any author attributions, legal notices or proprietary designations or labels in a file that the user mails or sends;
- Publishing, posting, distributing or disseminating defamatory, infringing, obscene or other unlawful material or information;
- Using the LIGHTHOUSE.NET Internet Service or systems to threaten, harass, stalk, abuse, or otherwise violate the legal rights (including rights of privacy and publicity) of others;

Newsgroup Spamming

Excessive cross-posting, or posting the same article to several newsgroups, is prohibited. Generally accepted standards allow no more than 6 newsgroups, or cross-postings, for a single article or substantially similar articles. Articles posted in violation of these policies may be canceled.

Off-topic or inappropriate newsgroup postings

Generally, there is no restriction on content or postings, except as defined by each newsgroup. Posting binaries to non-binary newsgroups is not allowed. Posting of off-topic articles is prohibited. Please note that commercial advertisements are off-topic in the vast majority of newsgroups.

Internet Relay Chat (IRC)

Violation of any accepted policies on IRC servers and the use of IRC bots is prohibited. If LIGHTHOUSE.NET Internet is banned or threatened with being banned or restricted from a server, the offending account may be terminated.

Miscellaneous

Any other behavior as determined by LIGHTHOUSE.NET Internet to be unacceptable. This includes any behavior deemed unacceptable by other ISPs, in violation of generally acceptable "Netiquette" practices, behavior which causes LIGHTHOUSE.NET Internet to be viewed unfavorably by others, or other behavior

which may cause LIGHTHOUSE.NET Internet to be adversely affected via e-mail or news blocking, or which may cause LIGHTHOUSE.NET Internet to appear on detrimental lists for spamming, etc.

Acceptable Use Policy Modifications

LIGHTHOUSE.NET Internet reserves the right to modify its Acceptable Use Policies at any time at its discretion. Such changes, or notice thereof, will generally be posted online on the Service or otherwise electronically transmitted to users over the Service. A subscriber's use of the Service after such posting or other notice shall constitute acceptance of such policies by the subscriber.

Revision effective 2/11/08 and overrides any prior revisions or versions.
